

NORTH CAROLINA DEPARTMENT OF LABOR
DIVISION OF OCCUPATIONAL SAFETY AND HEALTH
RALEIGH, NORTH CAROLINA

Chapter 7
Subchapter 7C
NC-OSH

CFR Revision 113

Field Information System Part I
Bloodborne Pathogens; Final Rule

DISCUSSION:

On December 6, 1991, Federal OSHA promulgated a new occupational health standard for General Industry. This new standard is intended to eliminate or reduce the health risks associated with occupational exposure to Hepatitis B Virus (HBV), Human Immunodeficiency Virus (HIV) and other bloodborne pathogens that can be transmitted through exposure to blood and other potentially infectious materials, as defined in the standard.

ACTION:

This new federal final rule at 29 CFR 19210 Subpart Z was adopted verbatim in North Carolina by the Commissioner of Labor with an effective date of March 6, 1992. A copy of the regulatory text from the [Federal Register](#) announcement (Vol. 56, No. 235) is attached. Please file this NC CFR Revision in Part I of your Field Information System.

Michael D. Ragland
Deputy Commissioner, Health and Safety
(Signed on Original)
