

**North Carolina Department of Labor
Occupational Safety and Health Division**

Raleigh, NC

Field Information System

CPL 02-00-042

Subject: Interagency Agreement Between the Mine Safety and Health Administration and
OSHA-USDOL

A. **Discussion.**

This instruction provides guidelines for implementing the Interagency Agreement between the Mine Safety and Health Administration and the Occupational Safety and Health Administration. This CPL was originally published on March 14, 1980. At that time, the OSH Division was following Standards Notice 40 (SN 40) - *Establishment of inspection boundary lines in operations where OSHANC and Mining Enforcement and Safety Administration (MESA) both have safety and health jurisdiction*. Historical records reveal that in 1988, and again in 1993, representatives from the NCDOL Mine and Quarry Bureau and OSH Division recommended that the OSH Division rescind SN 40 and adopt the CPL. However, records do not show the date SN 40 was archived or the date this CPL was adopted or became effective in NC.

B. **Action.**

The NCDOL OSH Division will follow the guidelines found in [CPL 02-00-042-Interagency Agreement Between the Mine Safety and Health Administration and the OSHA-USDOL](#).

C. **Effective Date.**

This CPL is effective on the date of signature. It will remain in effect until canceled or revised by the Director.
