Statesville, NC 28677

September 7, 2023

Concrete is the most widely used man made material and the literal foundation of the world's infrastructure. So, while construction booms unabated across North Carolina, so does the need for concrete. Capitalizing on this tremendous need the 2023 Construction Safety Forum focuses on "Concrete: The World's Foundation."

The Construction Safety Forum focuses on the methods and challenges of concrete installation and raises safety awareness of the following processes:

- Tilt-Up Construction
- Caste-In-Place
- Poured Concrete
- Municipal Installation & Maintenance

Please join us for the 2023 Construction Safety Forum as the NC Department of Labor hosts construction industry professionals to discuss these topics and more.
