

## **29 CFR Part 1910 – General Industry** STANDARDS REQUIRING SAFETY AND HEALTH INSPECTIONS

The table below includes 29 CFR Part 1910 – General Industry standards and North Carolina State-Specific standards that require inspections. Some standards require documentation of the inspection while others do not. As such, the standard should be reviewed to ensure that all required documentation is being maintained.

*Note:* It is recommended, as a 'best practice'', to always document your inspections even if a standard does not require it.
