

29 CFR Part 1910 – General Industry

STANDARDS REQUIRING SAFETY AND HEALTH PROGRAMS AND PLANS

The table below includes 29 CFR Part 1910 – General Industry standards and North Carolina State-Specific standards that require a program or plan. Many standards within Part 1910 – General Industry reference other standards that may require a program or plan, so they have been included with that standard. Further, many of these standards may not require the program or plan to be in writing. In these cases, the employer must decide whether or not to put the program or plan in writing. As a “best practice”, however, it is recommended that all programs or plans be in writing.

Note: While a program or plan may not be required to be in writing, there may be components of the “program” that may require documentation (e.g., certification records, training materials, inspection documents, monitoring records, hearing tests). As such, the standard should be reviewed to ensure that all required documentation is being maintained.

29 CFR Part 1910 – General Industry

STANDARDS REQUIRING SAFETY AND HEALTH PROCEDURES

The table below includes 29 CFR Part 1910 – General Industry standards, 29 CFR Part 1904 – Recordkeeping standards, and North Carolina State-Specific standards that require “standalone” procedures that are not part of a program or plan. Many of these standards require these procedures to be in writing. In these cases, the written procedures must be included as part of your overall comprehensive safety and health program.

Note: If a standard already requires a program or plan that is related to the procedure(s) required by the standard, the employer can incorporate them into the program or plan. Some procedures may not be required to be in writing but may have other documented requirements associated with them (e.g., permits, certification, inspection forms, manufacturer’s manual). As such, the standard should be reviewed to ensure that all required documentation is being maintained.

29 CFR PART 1904—RECORDKEEPING		
Subpart D—Other OSHA Injury and Illness Recordkeeping Requirements	Safety and Health Procedures	Written
1904.32—Annual Summary	<i>Reviewing Log</i>	<i>Not Stated</i>
1904.35—Employee Involvement	<i>Reporting Procedures</i>	<i>Not Stated</i>
