

29 CFR Part 1910 – General Industry

STANDARDS REQUIRING SAFETY AND HEALTH TRAINING

The table below includes 29 CFR Part 1910 - General Industry standards, 29 CFR Part 1904 – Recordkeeping standards, and North Carolina State-Specific standards that require training. Some require documentation and/or certification that training has been conducted while some do not require documentation of any kind. As such, the standard should be reviewed to ensure that all required documentation is being maintained.

Note: It is recommended, as a “best practice”, to always document your training even if a standard does not require it.
